

**Door bypass, lock picking, RFID cloning, social engineering, covert entry, reconnaissance, and lots more...**

**From the team who brought you, [“Hacking The Grid”](#)**

Based upon the upcoming book, *Physical Red Team Operations: Physical Penetration Testing with the REDTEAMOPSEC™ Methodology* -- for the first time in the industry, creator and founder, Jeremiah Talamantes teaches how to consistently, accurately, and efficiently execute Physical Red Team Operations leveraging the comprehensive REDTEAMOPSEC™ Methodology. The training converges Physical Red Teaming and Social Engineering testing for full-training exercises with students breaking into actual offices/buildings and social engineering real people, face to face.

The goal of the training is to immerse the student in as much of a Physical Red Team Operation as possible. The instructors will guide students as they undergo a full-cycle Physical Red Team Operation from the planning phase to the exfiltration phase. At every step, RedTeam's experiences, techniques, tactics and procedures will be integrated and make up the core foundation of the entire course.

**Visit our website for upcoming dates and don't forget to [register for training!](#)**

## Potential Full-Training Exercises

- Covertly break into a target office and plant a hardware backdoor on LAN
- Clone an RFID badge from a target in a public area
- Use social engineering to acquire information from a target
- and more...

## Sampling of Tools

- Lock picks, Shove-it, Under Door Tool
- Bump Keys, Practice Locks
- USB Ninja, NCFKill
- RFID Card Cloner
- and more...

<b>What You Will Learn</b>	<b>What You Will Do</b>
<b>Physical Red Team Operations</b>	<b>Full-Training Exercises (FTX)</b>
How to converge Physical and Social Engineering vulnerabilities	Plan, execute and report on a full-training Physical Red Team Operation
Covert and overt methods of entry into a target location	Conduct target reconnaissance both offline and online
Social engineering tactics, from telephone to face-to-face	Clone RFID badges, pick locks, steal keys and/or bypass physical security controls
Physical security scouting and recon	Learn how to identify and assess physical security weaknesses
Offensive Strike, Evade and Exfil	Make overt and covert entry into a target location, obtain objectives, cleanly exit, and exfil data/hardware

<b>Day 1</b> Overview, Planning, Team Mobilization	<b>Day 2</b> Physical Security Tools, Offensive Strike, Bypass	<b>Day 3</b> Secure Operational Orders, Evasion and Exfiltration
<b>Red Team Scoping, Planning &amp; Execution</b> <ul style="list-style-type: none"> <li>• Course introduction and overview</li> <li>• Intro to REDTEAMOPSEC™ methodology</li> <li>• Client communication and evidence management</li> <li>• Online reconnaissance</li> <li>• Offline recon, long-distance and short-range</li> <li>• Red team operations resource planning and roles</li> <li>• Team mobilization and staging</li> <li>• Training mission assignment</li> <li>• <b>Full-Training Exercises</b></li> </ul>	<b>Penetration Testing for Red Team Operations</b> <ul style="list-style-type: none"> <li>• Assess and acclimate</li> <li>• OODA and team movement</li> <li>• Physical security control exploitation</li> <li>• Evasion techniques</li> <li>• Facility penetration and control (C<sup>2</sup>)</li> <li>• Social Engineering I – foundation</li> <li>• Social Engineering II – body language, micro-gestures</li> <li>• Intro to physical security tools</li> <li>• Lockpicking basics – hands-on picking different locks</li> <li>• Bypass tools and techniques (under the door tool, Shove-it)</li> <li>• <b>Full-Training Exercises</b></li> </ul>	<b>Social Engineering Pretexting &amp; Execution</b> <ul style="list-style-type: none"> <li>• Physical control exploitation I</li> <li>• Physical control exploitation II</li> <li>• Acting on operational orders</li> <li>• Exit evasive techniques and covering tracks</li> <li>• Team movement to rally point</li> <li>• Collect and exfiltrate data/hardware</li> <li>• <b>Full-Training Exercises</b></li> </ul>
